

GumDrop™ & NICU Soothie®

DIFFERENCES

Children's Medical Ventures has introduced the NICU Soothie.

GumDrop is in use at hundreds of nurseries and NICU's and has significant advantages:

Hawai'i Medical GumDrop

Low profile, both sizes are safe to go home, fits ALL babies' needs!

Children's Medical Ventures NICU Soothie

Notch Design. Product states: for hospital use only.

DIFFERENCES

Hawai'i Medical GumDrop™

Two sizes – for preemie babies and newborns.

Lighter weight – stays in babies' mouths better.

Curved to fit baby's face.

Low profile accommodates mechanical ventilation, tube feeding AND allows flexibility to fit variety of CPAP systems.

Preemie and Newborn sizes pass CPSC pull-through safety test – can go home with baby and are available to parents.

No transition necessary. For ALL babies.

Children's Medical Ventures Soothie®

Two sizes – for preemie babies and newborns. Manufacturer states: for babies > 34 weeks gestation.

10% heavier.

Flat design.

Notched area helps allow space for mechanical ventilation and tube feeding – high points might impinge on some CPAP systems.

NICU Soothie is for Hospital use only.

Product states: For Hospital use only. Baby should be transitioned from the NICU Soothie to the Soothie prior to discharge. Extra step for nurses and hospital has to stock additional product sku's.

NICU Soothie and Children's Medical Ventures are registered trademarks of Children's Medical Ventures & Respirionics.
