Neurodiagnostic Equipment Solutions for the Private Practice

- Quality patient care
- Reliable information
- Efficient workflow
- Dependable service
Natus Neurology is your partner in advancing patient care. A global leader, Natus Neurology offers a comprehensive line of healthcare equipment and products used for screening, detecting, treating and monitoring common and uncommon neurophysical patient conditions. We work closely with you to improve patient lives.

Accurate, fast and easily retrievable information is vital. Natus Neurology has years of experience developing electrodiagnostic systems that help providers get the right information for the best patient care. Reliable condition assessment depends on the caliber of equipment used and directly affects how quickly treatment can be administered. Paired with the improved ability to efficiently access, archive and retrieve electronic medical records, we can help you increase the quality of care, improve safety and streamline workflow.

Our Natus Brand Promise
Trusted Customer-Focused Technology

Natus Neurology is committed to providing exemplary service to our customers. Our dedicated and experienced customer service team will assist with every aspect of an order. To support our products, we provide factory-trained field technicians and clinical application specialists for onsite support. Additionally, we provide an in-house technical support team, staffed with experts, and a strong distribution network in international markets to offer a wide range of service options. Allowing our customers more time to care for their patients is our goal. Customer loyalty is our reward.

Neurodiagnostic Equipment Solutions for Private Practice:
Meeting Your Patients’ Needs

Trusted History
Building on our neurodiagnostic heritage and developed in close cooperation with physicians and technologists, Natus Neurology systems are flexible and powerful enough to meet specific diagnostic needs without compromising ease of use or quality.

Dependable Equipment
Our specialists continually evaluate and improve neurological diagnostic systems to meet the ever-changing needs of customers. Providing easy reports and clinical support tools, Natus Neurology EMG and EEG systems can help optimize workflow, save time and increase productivity, ultimately improving patient treatment.

Comprehensive Service
Natus Neurology is committed to providing exemplary service to our customers. Our dedicated and experienced customer service team will assist with every aspect of an order. To support our products, we provide factory-trained field technicians and clinical application specialists for onsite support. Additionally, we provide an in-house technical support team, staffed with experts, and a strong distribution network in international markets to offer a wide range of service options. Allowing our customers more time to care for their patients is our goal. Customer loyalty is our reward.

Reliable Connectivity
Natus Neurology works closely with customers to facilitate connectivity solutions to improve the patient experience. The dedicated service team works closely with information technology staff to integrate Natus systems with electronic medical records and practice management systems. Data generated by Natus Neurology EEG and EMG equipment can transfer from private practice to hospital setting, from desktop to laptop easily, allowing an optimized workflow from acquisitions to final report.
Electrodiagnostics

Built on the expertise of the most widely used and trusted names in neurodiagnostics, Natus Neurology offers reliable Electrodiagnostic systems that will help you collect, retrieve and review patients’ EMG and EP neurophysiological data and make critical decisions regarding patient care.

**UltraPro S100**
Reliability, Performance, Portability – Exceptional Value
- Laptop or cart based system for routine studies
- 3 cable setup helps minimize install time
- On-screen help and instructional videos included in system software
- Simple user interface for easy navigation through procedures

**VikingQuest**
An efficient and reliable portable EMG solution
- Laptop or cart based configurations for NCS, EMG and EP exams
- Proven history in a broad range of applications
- Intuitive interface allows navigation through procedures quickly to reduce testing time
- Customizable set up and reports

**Nicolet® EDX System with Natus EMG Software**
Simplified, evolved performance
- Multi-modality testing using a proven software interface with laptop or cart based configurations
- Rich feature set and clinical automation
- Advanced technology amplifiers provide superior data
- High quality testing reduces data acquisition time

**Vista™ Ultrasound**
Making ultrasound accessible in a compact and affordable package
- Perform confirmatory ultrasound procedures in one patient visit
- Overcomes space restrictions by expanding utilization of select EMG workstations
- Built-in measurements, calculations, autoscan mode, saves time and improves efficiency
- Utilizes the USB port and display of the EDX or UltraPro S100 EMG systems with EMG v21.0.1 software or higher
Clinical EEG
Building on years of neurodiagnostic experience by innovators, Xltek® and Nicolet®, Natus Neurology’s EEG solutions provide the leading-edge features you want in critical care applications with the intuitive, user-friendly interface you need for productive day-to-day workflow.

Xltek® Laptop EEG with EEG32U Amplifier
EEG innovation at work
- Ideal for video and non-video EEG for routine studies
- Uses Natus NeuroWorks®, a flexible software solution designed to meet the needs of your practice
- HL7 communication with HIS and Natus DataShare
- One of the smallest and lightest amplifiers in the industry
- Optional photic stimulator, video and trolley cart

Xltek® EEG with EEG32U Amplifier
Leading-edge features & intuitive, user-friendly interface
- Easy to set up hardware capable of EEG and PSG studies
- Uses Natus NeuroWorks®, a flexible software solution designed to meet the needs of your practice
- Fully synchronized TCP/IP streaming HD video
- Integrated HIPAA Security layer with Active Directory integration
- HL7 communication with HIS and Natus DataShare

NicoletOne vEEG
Exceptional data quality, streamlined workflow
- Modularity allows for multiple test types to be run from a single system
- Easily manages system connectivity, patient records, clinical data and workflow
- Easy-to-use, high-quality amplifiers
- Advanced software capabilities with user-friendly controls
Ambulatory EEG
Natus Neurology’s trusted line of ambulatory EEG systems allow you to maximize patient care in your practice by providing new services with a single flexible device.

Xltek Trex HD
Ultimate versatility for all your EEG/PSG needs
• Up to 96 hours of best in class HD video, wirelessly synchronized with EEG
• No cables or computer to set up at home – avoid costly patient home visits
• Start and stop video without affecting synchronization
• Lightest ambulatory amplifier in the industry
• Enhanced patient comfort & mobility
• Perfect for both EEG & full featured sleep studies

Transcranial Doppler
TCD allows for non-invasive assessment of blood flow velocities in the basal cerebral arteries. This method has been well documented as a useful tool for examining the major arteries supplying blood to the brain.

Nicolet® SONARA
Enhancing patient care through diagnostic and monitoring technology
• High quality Doppler signal
• Customized protocols and reporting
• Emboli detection with variable thresholds
• Specialty Tests: VMR and BHI
• Multi-button advanced remote control

Natus Neurology Service
A global service organization here for you

Natus Neurology Essential Support Elements
• Accessible and effective technical support
• Definitive technical documentation and knowledgeable installation teams
• Excellent replacement unit or spare part availability
• Extended warranty and service coverage programs
• Comprehensive, flexible and regular customer training courses
EMG & EEG Supplies

Natus Neurology offers a full range of neurodiagnostic supplies and accessories, promoting patient comfort. Healthcare professionals count on Natus Neurology to help them deliver exceptional cost-conscious care with reliable results. Our dedicated customer service team provides a streamlined ordering and shipping process to save you time and money.

Disposable Concentric Needle Electrodes
Disposable concentric needle electrodes are renowned for optimal sharpness, consistently low impedances and lightweight cable and hub design.

Disposable Monopolar EMG Needle Electrodes
Disposable monopolar needle electrodes have consistently low impedance levels for accurate EMG recordings. Needles are coated with a low-friction insulator that is designed to facilitate smoother repositioning.

Genuine Grass Gold Disc Reusable Electrodes
Get unsurpassed recording clarity, long life and dependability right from the start. Every Grass electrode is made of the finest materials and is precision handcrafted in an exclusive 12-step manufacturing process.

Disposable EEG Cup Electrodes
The disposable EEG cup electrodes are made with patient safety in mind. Eliminate your risk of cross-contamination and decrease clean up time by using them once and throwing them away after the procedure.

Adhesive Electrodes
For single-patient use only, self-adhesive solid gel surface electrodes are both easy to reposition and comfortable for patients. Surface electrodes feature sensors for optimum signal quality and wires terminating in a safety-touch proof connector.

Disposable EEG Monopolar EMG Needle Electrodes
Disposable monopolar needle electrodes have consistently low impedance levels for accurate EMG recordings. Needles are coated with a low-friction insulator that is designed to facilitate smoother repositioning.

Creams, Gels and Pastes
Highly conductive electrolyte creams and gels ideally suited for use in electro-medical procedures. Products are non-irritating, hypoallergenic and bacteriostatic. Especially designed for EEG procedures, pastes have just the right balance of adhesiveness and conductivity.
